

# Revit MEP 2010

SERVICES

## Professional Service Offerings

### TRAINING

#### Revit MEP 2010 Level I: Essentials

4 Days | \$1,600 | Beginner

This hands-on, comprehensive course reviews design development, documentation, and analysis methods using Revit MEP. This class is designed to teach the Mechanical / Electrical / Plumbing professional how to use Revit MEP to create a Building Information Model (BIM), analyze that model, and then generate construction documents.

#### Revit Architecture 2010: For Project Managers

1 Day | \$400 | Beginner

This one-day class is designed for individuals, such as Supervisors or Project Managers, who need to view and manage existing electronic drawing content in Revit. This course will provide the students with the skills necessary to find, open and save, redline or markup, and print Revit models. Students will receive an overview of navigating the Revit environment, as well as basic drawing, editing, and annotation techniques. Knowledge of basic geometry and computer skills are necessary.

### OTHER

#### Workshops

1 Day | \$99 | Beginner

CMI's one day, in-depth, technical workshops are led by industry experts and are a great way to get a complete view of what the software can and cannot do. Ideal for those who don't necessarily need to use the software, but manage those who do, or for those who are still deciding on whether or not to implement. For only \$99 you will receive a full day of training, a detailed procedure guide, and a catered breakfast and lunch.

#### Tips and Tricks Web Site

[www.caddmicrosystems.com/tipstricks](http://www.caddmicrosystems.com/tipstricks)

The CADD Microsystems, Inc., Tips & Tricks web site is where you can see dozens of different tips, tricks, shortcuts, and undocumented procedures to help you take advantage of Autodesk Products.

#### Revit User Group for Washington, DC (RevitDC)

Visit the Washington, D.C., area Revit User Group web site and get connected with others using Revit in your area.

### CONSULTING

#### Implementation

CMI's "Implementation" is designed to setup your design software to be able to be used on all typical projects, utilizing company standards for project workflow and documentation. Our five phased approach includes:

**BIM Manager / Power-User Training** - Training designed to provide an overview of the capabilities of Revit to those who are going to help implement and support it

**Information Exchange** - Gather information about your current design processes

**Standards** - Use the information gathered to develop company-specific optimization

**User Training** - Focused training to show them how to efficiently use the features they need while utilizing the standards developed

**Continued Support** - create additional content, refine standards, over-the-shoulder assistance, etc.

#### Project Quick Start

CMI's "Project Quick Start" is designed to help setup and assist during a specific project, focusing on the readability of the final contract documents and utilizing the standards out-of-the box whenever possible. Our three phased approach includes:

**Project Member Training** - All pilot project team members attend an essentials training course

**Project Specific Standards** - Development and customization of project critical parameters, settings, families, annotation, and views

**Continued Support** - create additional content, refine standards, over-the-shoulder assistance, etc.

#### Installation Services

CMI can help with License Manager installation and configurations, deployment creation, and workstation installations.

### SUPPORT

#### Tier II Telephone Support

1 Year | \$599 | 2 Callers

The CMI Telephone Support Contract allows our clients to have software questions answered quickly and accurately over the telephone. A Telephone Support contract is designed to address problems that arise when the software is not functioning as it was designed to (crashes, tools not working, etc.). It is not meant to answer training, installation, or customization questions, but CMI will make every effort to assist and make recommendations for these types of questions as well.
